Alletec helps UK based Actis LLP establish their Data Strategy and leverage Microsoft Data Analytics

Overview

HQ: UK

Industry: Equity Investor

Customer Profile: ACTIS LLP (ACTIS) is recognized as a leading private equity investor in emerging markets and has been investing exclusively in these markets for nearly 60 years. ACTIS has its presence in over 20+ countries across the globe.

“Alletec has been a trusted partner for Actis across the various facets of our business process automation journey. They have helped us achieve our Finance, Reporting automation and Investor relationship goals. Project execution efficiency and domain expertise are their greatest strength areas”

ACTIS LLP (ACTIS) is recognized as a leading private equity investor in emerging markets and has been investing exclusively in these markets for nearly 60 years. ACTIS has its presence in over 20+ countries across the globe.

ACTIS operates via a centralized back-office, with this team churning out more than 800 reports on a Monthly, Quarterly, Half-Year and an Annual basis to the Board, Senior Management and Investors.

Reporting requires compilation of data from all organizational functions: Funds, Finance, Operations, HR etc.

Multiple disjoint business applications used across the organization make this Reporting highly complex and time consuming.

Our Mission

'Enabling Enterprises

Do More with Digital

Transformation'

Alletec Solution

Develop a 'Data' strategy with the Actis Business and IT stakeholders, in line with the Business and Financial KPIs – storage, compilation, slicing and dicing, visualization being the key aspects

Architect an Enterprise Data Warehouse (EDW) using Microsoft Technologies like SQL and Azure – build complex cubes getting data from the backend Dynamics ERP.

Build a seamless data integration layer from the ERP to the EDW – utilizing off peak business hours

Use SSRS and Power BI to build the needed visualizations and complex data calculations.

Benefits

Reporting turnaround time reduced by 25%

Reliability on Report outcome increased. Manual effort reduced to just verifying data rather than building reports.

Templatized framework for adding new cost centres – just takes 6-8 hours to include a new cost center

Drill down feature available to the lowest level
